

## Your community-based specialty medication service provider

Bayshore Specialty Rx offers a wide range of specialty pharmacy, reimbursement navigation and patient support services. Our clients include government care programs, pharmaceutical manufacturers, physicians, patients and other health care organizations. Our goal is to improve patient care through an integrated approach to home and community care with specialty pharmaceutical medications.

As a division of Bayshore HealthCare, Canada's largest home and community health care services provider, Bayshore Specialty Rx has a background founded in nursing. We provide care to patients out of hospital – in their home, or at one of our infusion clinics, and are a leader in care across oncology, neurology, rheumatology and rare diseases.

## Patient support programs

Designed with pharmaceutical manufacturers, these programs integrate patient education, reimbursement navigation, pharmacy/wholesale, compassionate & bridging drug and nursing.

## Infusion and injection services

Either through a PSP or as a referral from healthcare teams, our national network of clinics are a safe and convenient choice for specialty drug administration. Like a hospital, Bayshore Clinics offer the highest level of safety, comfort and clinical expertise. Our clinics model current best practices from hospitals and provincial cancer care programs, ensuring their safety standards and guidelines are available to support patient care in a more relaxed environment – closer to home.

## Bayshore Pharmacy

We have a national network of specialty pharmacies with one in each province. Our deep knowledge and experience with specialty medications allows us to provide counsel and care to improve patient health outcomes. We not only dispense medications, but provide ongoing care to improve health outcomes. Medications are produced in a sterile environment and in compliance with USP and NAPRA standards. We also ensure that the storage and shipment of medication is carefully controlled and monitored.

## Clinical Trials

Bayshore understands how to manage the specialty pharmacy and nursing components of clinical trial programs. While maximizing efficiencies to reduce costs for hospital, pharma and KOL stakeholders, we provide better care and experiences for patients participating in clinical trials and provide an option for the PI to have a greater range for subject recruitment and retention.

## Data & Analytics / RWD & HEOR

Longitudinal, national data is captured from multiple pathways including wholesale, pharmacy, reimbursement, HCP's and RN. We offer strength in analytics and the ability to customize data capture to support RWE & HEOR in support of HTA & Reimbursement needs.

## Reimbursement

Bayshore offers reimbursement for patients and caregivers through complex specialty, oncology and rare disease therapies with Public, Private, and company access programs (compassionate/bridging).
